

HI-VIS INNOVATION

2024/25

4 262443 892727

Welcome to Korntex!

WE MAKE TEAMS WORK!

Korntex, a mid-sized company based in the Swabian metropolis of Stuttgart, we specializes in high-visibility products (Hi-Vis) and places the utmost' value on speed, efficiency and quality.

Our passion is to put your satisfaction first and to become the leading supplier in the field of Workwear and occupational safety in Europe. We see ourselves not just as a manufacturer, but as a partner who is committed to meeting your individual needs. Korntex is more than just products - it's about long-term partnerships. Welcome to Korntex, your reliable partner for Hi-Vis products and occupational safety!

Designed and developed in Germany

Our highly talented development team in Stuttgart is responsible for the innovative design of new products. The outstanding textile designs are also created in this picturesque region. Korntex exports its products to almost all corners of the world and therefore makes a significant contribution to strengthening the domestic economy.

In our efforts to make a positive impact on the environment, our textile company is passionately committed to social and ecological responsibility. Our entire production chain is geared towards ethical working practices and environmentally friendly materials. From the cultivation of our raw materials to the manufacturing of the final products, we are committed to fair wages, safe working conditions and sustainable manufacturing processes. We are also committed to adhering to the highest environmental standards and are actively involved in protecting workers' rights. Each one of our products tells a story of commitment towards a better world - a story that we proudly present in our sustainable textiles. As a sign of special recognition for these achievements, the German Innovation Institute for Sustainability and Digitalization has therefore awarded us with the "Employer of the Future" award.

Protection of your data (TISAX)

The protection of sensitive information plays a central role in our corporate philosophy. We secure our customers' data with a carefully implemented information security management system (ISMS). This commitment is reinforced by the fact that we are currently certifying these processes in accordance with TISAX, one of the highest standards for the complete protection of sensitive information. Our customers can be confident that their data is safe with us.

Disclaimer

The colours shown in the catalog may differ slightly from the original, as they appear differently depending on the light source. The exact reproduction of textile colours on paper print is almost impossible, especially with neon colours. We listen carefully to your feedback and are constantly working on making improvements. Therefore, our products may show slight differences in certain productions, e.g. in the colour of the hem or Velcro.

If you order larger quantities, we will gladly send you a sample so that you can check the colours. Please note that there may be slight variations in the fabric colour depending on the batch.

“For a sustainable future”

SUSTAINABLE AND SAFE

“WE ARE CONTINUING THE STORY OF CO₂-NEUTRAL HIGH-VISIBILITY VESTS!”

Here at Korntex, we are aware of our responsibility towards the environment. Our primary goal is to reduce our ecological footprint in a sustainable way.

In 2021, the independent organization Fokus Zukunft (fokus-zukunft.com) carefully examined our entire value chain and calculated the precision of the CO₂ emissions per high-visibility vest produced. This represented a major step towards climate protection.

As a result, we decided to take a ground-breaking approach and pioneer the industry by developing and producing the world's first CO₂-neutral high-visibility vest. In 2022, we proudly launched the “Paris” high-visibility vest, an outstanding product that offers companies the opportunity to also focus on sustainability when purchasing safety vests.

To offset our negative carbon footprint, we invested in our first climate measure - the construction of a wind farm in China. This wind farm generates clean energy that is used exclusively for the production of our vests. At the same time, this helps to keep climate-damaging lignite in the soil instead of extracting it.

Due to the enormous success of the basic high-visibility vest “Paris”, we were delighted to present the multifunctional high-visibility vest “Hamburg” (item KXCMF) in 2023 - another completely climate-neutral innovation. In 2024, we are set to continue this same success story with the Korntex kidswear collections “Action Line” and “Funtastic Wildlife”, which were developed to be climate-neutral from the very beginning.

We look forward to further fascinating projects in global climate protection! Please join and accompany us on this journey - after all, only together can we make a difference!

Dr. Alexander A. Jurack

EN ISO 20471

1
2
3

This standard specifies the requirements for high-visibility warning clothing. The high-visibility clothing must ensure that the wearer is highly visible in all lighting conditions:

- The wearer must be easily recognizable in daylight, by vehicle headlights in the dark or when viewed by other technical equipment.
- The performance requirements of this standard concern material colours, the minimum surface area on the materials, retroreflection, and the placement of strips on the high-visibility clothing.

MINIMUM AREA IN M² EN ISO 20471

Class	Class 1	Class 2	Class 3
Fluorescent materials	0,14 m ²	0,50 m ²	0,80 m ²
Reflective Material	0,10 m ²	0,13 m ²	0,20 m ²

We welcome the new standard!

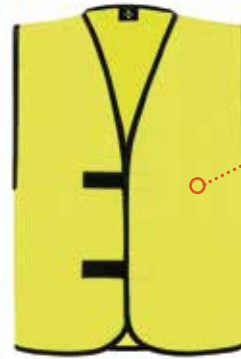

Since November 1, 2020, this standard has replaced EN 1150 and EN 13356. The standard specifies the requirements for equipment with increased visibility in the form of garments or products that are capable of visually signaling the presence of the wearer.

The increased visibility equipment is designed to make the wearer more visible in medium risk situations, in all daylight conditions and/or when illuminated by vehicle headlights in the dark.

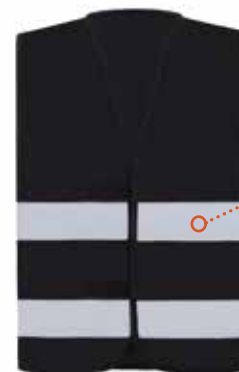

HIGH VISIBILITY: FLUORESCENCE VS. REFLECTION

Increased visibility in daylight thanks to fluorescent material.

KXL Leipzig Type A

Increased visibility in the dark thanks to retroreflective material.

KXFW Dortmund Type B

Increased visibility thanks to fluorescent material and retroreflective material in daylight, twilight and darkness.

KXFW Type AB3

STANDARDS FOR SAFETY HELMETS

EN 397

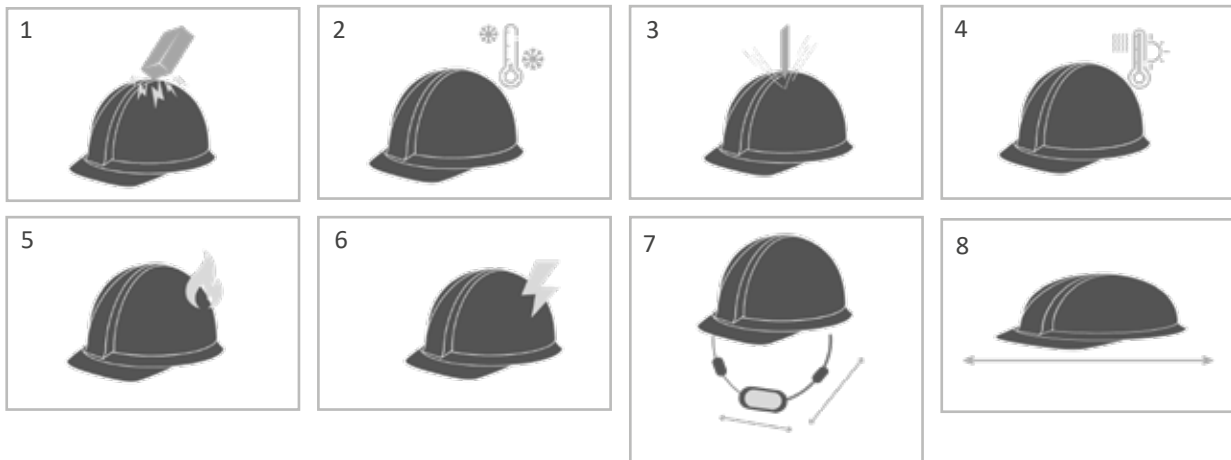

EN 397:2012+A1:2012

The European standard for safety helmets (EN 397) provides manufacturers of safety helmets with guidelines to ensure that the helmets provide adequate protection for the wearer. It also specifies the requirements for the testing of safety helmets, as they must be designed to protect the wearer from falling objects. Such protective measures safeguard the user against possible consequences such as brain injuries or skull fractures. The standard also includes protection against lateral deformation of the helmet.

The helmet consists of two main parts - the hard outer protective shell and the inner retention system. All helmets certified to EN 397 must meet the following requirements:

All helmets certified to EN 397 must meet the following requirements:

- 1 - Shock absorption, vertical
 - 2 - Protection against low temperatures (-20 °C or -30 °C)
 - 3 - Penetration resistance (against sharp and pointed objects)
 - 4 - Protection against very high temperatures (+150 °C)
 - 5 - Flame resistance
 - 6 - Electrical insulation (440 V)
 - 7 - Chinstrap fastening: Chinstrap unfastens at a minimum of 150 N and a maximum of 250 N
 - 8 - Lateral deformation
-

HELMETS

Basic Protection Helmet - KXBHELMET - "Le Havre"

- Standard construction safety helmet with integrated rain gutter
- Pleasant wearing comfort
- Integrated adapters on side for attaching visors and hearing protection
- Certified according to EN 397

- Material: 100% polyester
- One size fits all = 45 x 10 cm

GLOVES

STANDARDS FOR GLOVES

EN 420

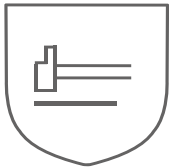

EN ISO 21420:2020

This standard specifies the general requirements and relevant test methods for glove design and construction, harm minimization, comfort and effectiveness as well as the manufacturer's labeling and information applicable to all protective gloves.

The general requirements for protective gloves include:

- Standardized dimensions for sizes
- The gloves should not pose a risk or cause injury or allergies
- The glove material should have a pH value between 3.5 and 9.5 (neutral)
- The maximum permissible value for chromium VI in glove material is 3 mg/kg
- The labelling of gloves and packaging is also standardized

EN 388

EN 388:2016+A1:2018

This European Standard specifies requirements, test methods, marking and information to be provided for protective gloves against the mechanical risks of abrasion, cutting, tearing, puncture and, where appropriate, impact. This standard is used in conjunction with EN ISO 21420:2020.

“This is a global innovation that raises the combination of safety and fashion for children to a new level.”

Manfred Harscheid

ACTION LINE

Welcome to an exciting conversation about the latest innovation from Korntex - the Action Line! We spoke with Sophia Peric, Head of Fashion Design and Manfred Harscheid, Commercial Director of Korntex. The Action Line, our brand-new collection of high visibility vests for primary school children, has taken the fashion world by storm. With unique themes, dynamic cuts and innovative designs, this collection offers not only safety, but also style for young adventurers.

Alessia Dipalma, Junior Head of Marketing

Alessia: Hello, Sophia. As Head of Fashion Design at Korntex, you are responsible for the development of new products such as the Action Line. Can you give us an insight into the inspiration behind this collection and how you ensure that it meets the needs of our young target group?

Hello, of course, the Action Line is an exciting innovation for Korntex. The inspiration for this collection came from the idea of making high visibility vests not only safe, but also fun and stylish. Each theme in the collection represents different interests and activities, from sports and cars to space and dinosaurs. This ensures that the collection has something suitable for every child

Alessia: Hello Manfred. As Commercial Director of Korntex, you are significantly involved in the implementation of new product ideas. The Action Line not only raises the bar with its cool designs, but also with innovative details such as the printed, reflective part of the vests. Can you tell us more about it?

Sophia Peric

Manfred Harscheid

Manfred: Hello, absolutely, the Action Line really is a groundbreaking innovation! The areas printed with themed motifs on the high-visibility vests are the result of intensive research and development with our fabric suppliers. These motifs are not only eye-catching during the day. At night, a patented coating ensures that the printed areas are fully reflective. This is indeed a genuine innovation that raises the combination of safety and fashion for children to a new level. And all of it is completely climate-neutral, mind you!

Alessia: Sophia, how do you ensure that the cuts and designs in this collection are specifically tailored to the primary school age group?

Sophia: When designing the Action Line, we focused particularly on cool and child-friendly styles. Each theme has an individual, dynamic design that not only looks stylish and matches the corresponding theme, but also the individual identity and areas of interest of the children. We would like to see children proud to wear their Korntex high-visibility vests, whether on the way to school or in their free time. The cool designs are meant to boost self-confidence and make wearing them fun.

In conclusion:

The Action Line from Korntex is not merely a collection of high visibility vests, but a statement of safety, style and fun for young adventurers. With the different themes, cool cuts and innovative designs, Sophia Peric and Manfred Harscheid have created a collection together with their team that not only meets the needs of children, but also sets a new standard for child safety and fashion.

FUNTASTIC WILDLIFE

And it goes on with an exclusive insight into the exciting world of clothing for nurseries and first graders! Today, two key figures at Korntex, who always strive to combine creativity, functionality and application opportunities, talk about one of the highlights of Korntex Kidswear for the coming season: the Funtastic Wildlife collection!

This is a series of high visibility vests for children that not only offers safety but also a lot of fun. Alessia Dipalma, responsible for the creation of this catalog, asks Dr. Alexander Jurack, Managing Director of Korntex, and Padiana Schnelzer, Head of Internal Sales, about the creation and unique features of this collection and potential applications.

Alessia Dipalma: Alexander, can you tell us more about the Funtastic Wildlife collection? What inspired you to come up with this innovative idea?

Alexander: The idea for this collection came about when I noticed that kindergarten groups are often organized in different animal motifs. At the time, I was part of the lion group myself and thought, why not integrate this variety into high-visibility vests for children? The Funtastic Wildlife collection currently consists of around ten different animal motifs on the front of each vest.

Alessia: That sounds fascinating! Paddy, as Head of Internal Sales, how is this diversity used in practice?

Padiana Schnelzer

Dr. Alexander Jurack

Paddy: These 100% climate-neutral high-visibility vests consist of fluorescent and reflective parts. The reflective part is represented by the footprints of the depicted animal, which is not only safety-conscious but also provides an interesting learning effect for the children. Not only can educational institutions print their names and contact details on the free belly area of the animals, but local companies can also use these vests as promotional gifts as part of a kindergarten or first grade sponsorship.

Alessia: Interesting! Can you tell us more about the wearing options for the Funtastic Wildlife collection?

Paddy: Of course! The vests come in two sizes and have a Velcro fastener on the side and shoulder, which makes it easy for the little ones to put them on and take them off. The cute animal motifs and reflective paws, footprints and hooves not only give the product a more vibrant look, but also make it more appealing to young explorers and as a mother I know how important that is.

Alessia: Alexander, are there any other applications or special features that should be emphasized?

Alexander: Absolutely! The variety of animal motifs also makes it possible to distinguish between different groups of children, whether in the kindergarten itself or on excursions. Teachers can thus determine the presence of the children more quickly by simply counting the different animals. With the Funtastic Wildlife collection, we not only want to ensure children's safety, but also stimulate their imagination and offer a playful learning effect. It's an exciting combination of functionality and creativity that helps prevent accidents on the road, reflecting our mission at Korntex.

FUNUNICYW - Unicorn

Silver Reflective Film - REFLEX5025

- Premium Silver Reflective Film made from metallized micro glass beads
- Suitable for transfer onto textiles such as cotton, polyester/cotton blends, and polyester/polyacrylic blends
- Easy processing due to adhesive coating on the back
- Compatible with all standard plotters
- Recommended to use a standard blade (45°)
- Wash resistance: 40° C
- Tumble dryer safe below 50° C
- Adhesive: Acrylic hot melt adhesive
- Thickness in mm: 0,14 – 0,17
- Liner: PET film
- Transfer conditions: Temperature: 160°, Pressure: 3,5 bar, Time: 15 Sec
- Turn inside out before washing
- Minimum retroreflection values according to EN ISO 20471

Measures 25 m x 0,5 m

- Material: 100% polyurethane

Water repellency:

Water repellency: refers to the measurement and certification of the ability of textiles and clothing to repel water. It ensures that products can be labeled as "water repellent" if they meet certain performance requirements and protect against moisture.

CE Symbol:

Indicates that products comply with European safety and conformity standards.

EN 1149 Antistatic:

The EN 1149 antistatic standard in Europe refers to the certification and labeling of products with antistatic properties.

EN ISO 14116 Flame retardant:

It ensures that products can carry the EN ISO 14116 mark if they meet the relevant requirements and regulations to prevent the spread of flames and provide protection against fire hazards.

EN ISO 21420 Basic standard for gloves:

EN ISO 21420 is the basic standard for gloves in Europe. This standard refers to the basic requirements for gloves and ensures that products meet the requirements in terms of construction, fit, design and material.

UKCA marking:

It ensures that products can carry the UKCA mark if they meet the necessary requirements and regulations for marketing in the UK after Brexit.

EN 13758-2 UV - Sun protection:

It ensures that products can carry the EN 13758-2 mark if they meet the requirements and regulations for protection against ultraviolet radiation and provide effective protection for users.

Dual System:

The "Zentek Dual System" standard in Europe refers to the certification and labeling of products that meet the standards of the Zentek packaging recycling system.

EN 343 Waterproof:

It ensures that products can carry the EN 343 mark if they meet the requirements and regulations for protection against water and offer users effective protection against wetness.

DIN EN ISO 20471: 2013/A1:2016:

It ensures that products can carry the EN ISO 20471:2013/A1:2016 label if they meet the requirements and regulations for the visibility and safety of workers exposed to risks in working environments.

EN 388 Mechanical risks:

It ensures that products can bear the EN 388 mark if they meet the necessary requirements and regulations for the protection of hands against mechanical risks such as cut, puncture, tear and abrasion hazards.

EN 17353 Type B:

Increased visibility in the dark thanks to retroreflective material.

EN 17353 Type AB:

Increased visibility thanks to fluorescent and retroreflective material in daylight, twilight and darkness.

EN 17353 Type A:

Increased visibility due to fluorescent material in daylight

SPECIAL PRODUCTIONS

Customized production offers you many advantages:

The most important guarantee of quality is the careful selection of our suppliers. First-class quality products can only be created by purchasing high-quality fabrics and reflective materials. This is why we have been working with renowned companies for many years.

There are no limits to customization. You are free to decide everything from the imprint to the key ring. Before production, you will receive a sample for approval so that you can be sure of the quality of our products. The import process can be completed in four simple steps:

1. **Conception** Our consulting and design team will help you realize your ideas.
2. **Approval** We only get started when you are satisfied with the samples.
3. **Production** Experienced and trained employees sew your order.
4. **Delivery** An optimized supply chain ensures safe and punctual delivery.

Get in touch with us and benefit from our free design consultation to ensure that your workwear is not only functional, but also represents your brand in the best possible way.
